

## **Visual Art Philosophy Statement by Alessandra Freitas**

I love to take pictures of nature. Especially flowers and trees. The shapes and colors makes me feel good. It's exciting to take aspects of nature and document on photo paper. It brings me peace when I submerge myself in nature. I also like shooting pictures of people when they are unaware that i'am doing so. When i'm walking the streets and taking a picture of someone, i like to capture them in their natural environment. I can make up a story from the picture, i can imagine things in my mind, and i can document what was going on in that time. When I look at faces, I can tell how they are feeling , if they are sad or happy.

Nature, people and places are the things that catch my attention. I love to see these types of images on photo paper.
